PROFESSIONAL SUMMARY

Data Analyst with a strong statistics foundation and core strengths in SQL and Python, covering the analytics workflow from data cleaning to dashboard reporting in Power BI and Excel. Nearly two years of self-directed practice with Excel, SQL, and Python, and about a year with Power BI and Tableau. Currently pursuing a BSc in Statistics at the Federal University of Technology Minna, and building cross-functional Agile experience through TechFleet.

EXPERIENCE

Data Analytics Volunteer, TrackPoli Project | TechFleet Community

Project-Based Volunteer · Joined Phase 3, Aug 2026 · Remote, International Team

- Joined TrackPoli, a Nigerian civic-tech election-tracking platform, in Phase 3 of its five-month build within an international, cross-functional Agile team.
- Participate in sprint planning and product research, learning Agile practices through direct involvement in team ceremonies.
- Practice FigJam-based collaborative wireframing and asynchronous, cross-time-zone team coordination.

ANALYTICAL PROJECTS

Independent practice projects built on public datasets, not client or employer work.

Marketing Campaign A/B Test Evaluation | MySQL · Python (pandas) · Chi-Square Testing · Power BI

- Cleaned and analyzed Kaggle's Marketing A/B Testing dataset (588,101 users) before running statistical tests.
- Used a Chi-Square test to confirm a 43.14% lift in conversions over a no-ads control group (2.55% vs. 1.78%, $p = 1.705 \times 10^{-13}$).
- Found a 12 PM–2 PM peak window and Monday as the top-converting day (231 orders) via SQL analysis.
- Found converters saw far more ads on average (83.91 vs. 23.27), showing repeated exposure outperforms one-off ads.

Superstore Sales Performance & Regional Profitability Analysis | Power BI · Excel · Descriptive Statistics

- Cleaned and restructured four years (2023–2026) of Kaggle's Superstore dataset in Excel, building year-by-region breakdowns.
- Found nearly identical discount rates across top- and bottom-performing regions, ruling out discounting as the driver of profitability.
- Tracked sales share rising from 21% to 32%, tracing the West's \$0.74M lead and South's \$0.39M cap to operational factors.
- Built an interactive Power BI dashboard (.pbix) with regional breakdowns and executive-ready recommendations.

EDUCATION

Federal University of Technology Minna

Bachelor of Applied Science (BASC), Statistics · Nov 2024 – Sep 2029 (In Progress)

Cisco Networking Academy

Data Analytics Essentials · Aug 2026 – Present (In Progress)

CERTIFICATIONS

- MySQL for Data Analytics and Business Intelligence (Udemy, 2026)
- pandas Essential Training (LinkedIn Learning, 2026)
- Excel: Managing and Analyzing Data (LinkedIn Learning, 2026)
- Data Analytics for Business Professionals (LinkedIn Learning, 2026)

TECHNICAL SKILLS

Programming & Databases: Python (pandas), SQL (MySQL Workbench)

Statistical Methods: Hypothesis Testing (Chi-Square), Descriptive Statistics, A/B Testing, Market Analysis

BI & Reporting Tools: Power BI, Tableau, Excel (Advanced)

Data Skills: Data Cleaning, Trend Analysis, Data Visualization, Customer Segmentation, KPI Tracking

Ways of Working: Agile collaboration, sprint planning, cross-functional teamwork, FigJam
